expanded_report_quantile3_s51_v1 · metal-poor reference FeH < −2
teff · natural eligible n=998
natural_xp: n=935
natural_no_xp: n=63
Prediction − reference: Teff [K]
Reference Teff [K]
logg · natural eligible n=965
Prediction − reference: log g [dex]
Reference log g [dex]
fe_h · natural eligible n=998
Prediction − reference: [Fe/H] [dex]
Reference [Fe/H] [dex]
alpha · natural eligible n=4
Prediction − reference: [alpha/Fe] [dex]
Reference [alpha/Fe] [dex]
age · natural eligible n=1
Prediction − reference: Age [Gyr]
Reference Age [Gyr]
distance · natural eligible n=1
Prediction − reference: Distance [kpc]
Reference Distance [kpc]
Reported-label references, not physical truth. Age/distance may be catalogue-posterior medians. Missing labels are never imputed. Axes use central 99% of references/residuals; full-population metrics include all finite eligible rows.
Natural no-XP is official availability; masked-XP is a separate stress ablation. Point functional: intrinsic conditional median
